BARBERSHOP: INTEGRATED MONEY & BUSINESS MANAGEMENT SYSTEM

BACKGROUND

Many barbershops take bookings by phone and keep payments, attendance and salary on paper. This causes double bookings and unclear sales.

KI'AD Booking System is a secure web system for KI'AD Barbershop that brings booking, payment, attendance and payroll together.

METHODOLOGY

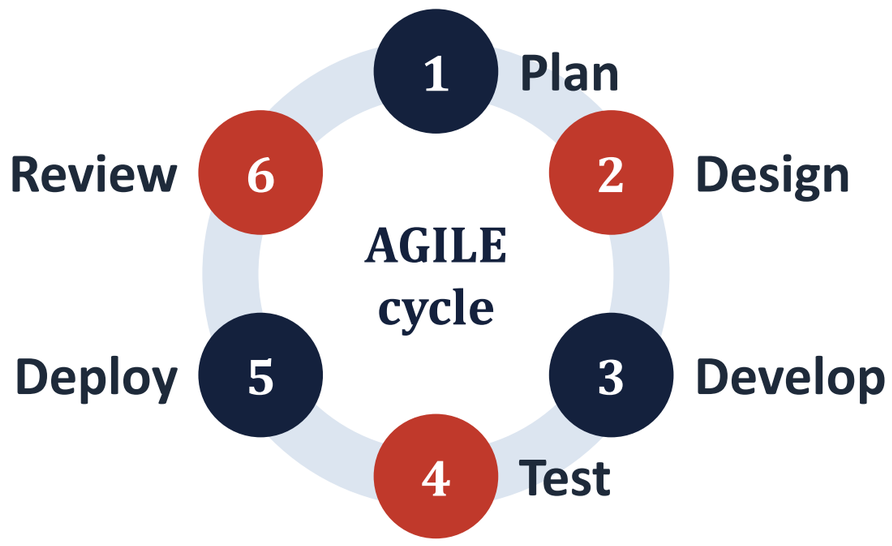

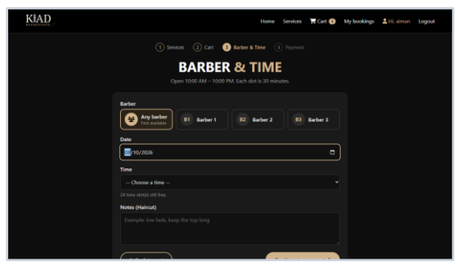

Figure 1: Agile methodology used in the project

OBJECTIVES

1. To develop online booking with no double booking
2. To record cash and QR payments with owner checks
3. To centralise attendance and payroll with secure access

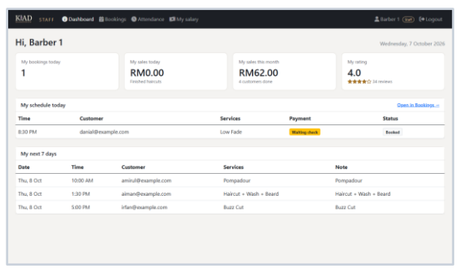

SYSTEM OVERVIEW

CUSTOMER books and pays

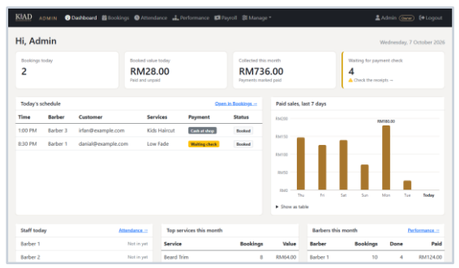

- Register and log in securely
- Pick service, barber and time
- Pay cash or QR with receipt
- Track bookings, rate the barber

STAFF / BARBER serves and clocks in

- See own bookings and sales
- Mark cash received and Done
- Clock in / out by QR scan
- View attendance and salary

OWNER controls the business

- Sales dashboard, top services
- Verify or reject QR payments
- Attendance and payroll
- Manage services, staff, settings

CONCLUSION

The system meets its objectives: clash-free online booking, verified cash and QR payments, and QR attendance with payroll.
37 system tests passed and 27 users rated it 4.5 out of 5. Future work: online payment gateway and expense tracking.
